

# Odylia THERAPEUTICS **CHANGE FOR A CURE**

Curing rare diseases transforms lives and redefines what's possible in medicine. Over 400 million people are affected by a rare disease worldwide, nearly half of them children. "Change for a Cure" is an easy way to make a difference for rare disease patients while bringing in foot-traffic and helping the environment. Everyone wins!

## Who

Odylia is a nonprofit (501c3) developing life-changing treatments for rare diseases. Since 2017, we advanced treatments for vision loss, rare pediatric seizure disorders, genetic forms of autism, overgrowth disorders, and others. As of today, collectively our work has the potential to improve the lives of more than 144,000 people with rare diseases and their families. And this number continues to grow. Our lead program has **Rare Pediatric Disease** and **Orphan Drug Designations from the FDA** and we plan to begin clinical trials by 2027.

## What

Place a collection box in your organization to gather foreign currency. Anyone who has traveled abroad has leftover change or currency from their trip. It is too much of a hassle or not possible to convert the change back to US Dollars - instead they can donate it to Odylia.

## Why

Odylia gathers foreign currency and returns it in-bulk, receiving a donation in US Dollars in exchange. Donating foreign currency doesn't just help Odylia, it helps in the re-circulation of foreign coins and reducing the number of coins needing to be made in the future!

## How

Odylia will provide an acrylic box with instructions, just place it in a visible location. We'll check on it regularly but you can also contact us anytime to pick it up. Odylia will promote your business as a donation location, driving foot traffic through our *Google Ad* Grant which reaches thousands of people each month; through our social media channels; and on our website where your location will be listed as a donation spot.
